

October 9 – 11, 2023 at Ohio State University Marriott

Tech Talks – October 10 – 4:30 – 5:30 pm

NITL represents their shipper members in three modes, ocean, highway, and rail, and we thought an effective way to highlight innovative technology across these modes was to have a [Tech Talks](#).

Does your company have what it takes to present your product in record time? The *six* innovators will bring the latest industry advancements and technology by ensuring the key details are explained as companies work against the clock to bring the problem and the solution to you. Your company has seven minutes to introduce to the participants your company and product. Once your time is up, the lights go out!

But your \$5,000 Partnership in the [Tech Talks](#) includes participation in NITL's entire Conference, and the ability to network further with shippers and supply chain leaders.

If you are interested in participating in the [Tech Talks](#), please contact Valerie Sumner – vsumner@vrsevents.com or Nancy O'Liddy – nancy.oliddy@nitl.org.
