Statement of the National Industrial Transportation League in response to introduction of the Ocean Shipping Reform Act of 2021

The National Industrial Transportation League welcomes the introduction of the Ocean Shipping Reform Act of 2021 by Representatives John Garamendi and Dusty Johnson and their commitment to addressing the significant challenges occurring within the maritime network.

Ocean shippers have experienced tremendous operational and financial burdens within the maritime supply chain for months, with no end in sight. The timely introduction of OSRA 21 offers practical solutions to strengthen the ocean network and provide relief to businesses, and ultimately consumers, that have suffered through the upheaval of the network.

NITL fully endorses this bill and we look forward to working with Representatives Garamendi and Johnson and other members of Congress to support passage of this critical legislation.
